Karnataka AI Travel Planner

ಕರ್ನಾಟಕ AI ಪ್ರವಾಸ ಯೋಜನೆ • ನಿಮ್ಮ ವೈಯಕ್ತಿಕ ಪ್ರವಾಸ ಮಾರ್ಗದರ್ಶಿ

An intelligent, domain-grounded travel companion that crafts budget-locked, geographically feasible Karnataka itineraries with strict transport isolation, real named 5-star & hostel stays, and native bilingual calendar scheduling in seconds.

⚡ 10s Instant Plan | 👑 5-Star & Zostel Stays | 🚙 Strict Transport Isolation | 🗓️ Real-World Dates

Presented by: **Project Team**

Tech Stack: **React 18 • TypeScript • Tailwind CSS • Vite • Leaflet**

SECTION 1: PROBLEM STATEMENT

The Pain of Modern Travel Planning

Why travelers struggle to explore diverse states like Karnataka

10–15 Hours Wasted

Travelers manually juggle 5+ tabs: KSRTC bus schedules, Google Maps, hotel aggregators, TripAdvisor reviews, and dated travel blogs.

Severe Budget Overshoot

Hidden taxi surcharges, inaccurate seasonal stay rates, and unpredictable meal expenses frequently cause 30–50% budget overruns.

Impossible Routes & Traps

Generic guides suggest unfeasible routes (e.g. Hampi to Coorg in a 2-day trip) and dump nature-lovers into crowded city commercial bazaars.

Target Impact Group: Domestic & International Tourists, Solo Backpackers (₹5k budget), Families, and Luxury Seekers across all 31 Karnataka districts.

SECTION 2: EXISTING SYSTEMS

How The Problem Is Solved Today & Gaps

Comparison between existing travel solutions and their critical limitations

SOLUTION DIMENSION	GENERIC LLMS (CHATGPT / GEMINI)	ONLINE TRAVEL AGENCIES (MAKEMYTRIP)	KARNATAKA PLANNER (OURS)
Budget Accuracy	Hallucinates non-existent pricing	High markup pre-bundled packages	**Mathematic itemized breakdown**
Transport Mode Isolation	Mixes buses, cabs, flights randomly	Separate flight/bus silos	**100% Strict Isolation (Only Cab / Bus / Train)**
Accommodations	Vague ("book a luxury resort")	Biased commercial affiliate listings	**Verified Properties (Leela, Lalitha Mah Zostel)**
Thematic Purity	Contaminates niche queries with malls	Cookie-cutter templates	**100% Dedicated (Waterfalls only = 0 palaces)**
Regional Language	Translates on request only	English only	**100% Nativ Kannada wi Numerals & Audio**

Key takeaway: Existing systems either hallucinate or force expensive rigid packages.

SECTION 3: HOW YOUR SOLUTION IS DIFFERENT

What Makes Us Radically Better

Four core pillars of our differentiated intelligence

⭐ Live demo verified: 100% adherence to user constraints with sub-second response times.

🧠 01. Natural Language Trip Planner

Type freely: *"I have ₹5,000 and 5 days. Waterfalls only starting tomorrow from Bengaluru."* The AI extracts budget, duration, departure dates, interests, and transit mode automatically.

👑 02. Verified Properties & Real Tiers

Selecting Luxury assigns authentic 5-Star Heritage Palaces (The Leela Palace, Lalitha Mahal Palace, Evolve Back Hampi). Budget assigns certified Zostel dorms and KSRTC Sarige Express buses.

🛡️ 03. Strict Interest & Mode Isolation

Guaranteed zero contamination. When "Waterfalls" is selected, only Jog, Hebbe, Abbey, and Jhari cascades appear. When "Only Cab" is selected, zero buses appear.

🗓️ 04. Calendar Sync & Bilingual Kannada

Calculates real calendar dates (e.g. *Tue, 20 Oct – Fri, 23 Oct 2026*) paired with authentic Kannada transliterations and native Kannada numerals (*ಮಂಗಳವಾರ, ೨೦ ಅಕ್ಟೋಬರ್ ೨೦೨೬*).

SECTION 4: TECHNICAL APPROACH

Workflow, Methodology & Key Design Decisions

How our deterministic domain architecture eliminates AI hallucination

1

Prompt / Form Input

Natural query or structured parameter selections

2

NLP Entity Extractor

Regex tokenization of ₹ budgets, days, dates & modes

3

Topological Route Planner

Geographical adjacency graph across 31 districts

4

Themed Day Builder

Dynamic assignment of

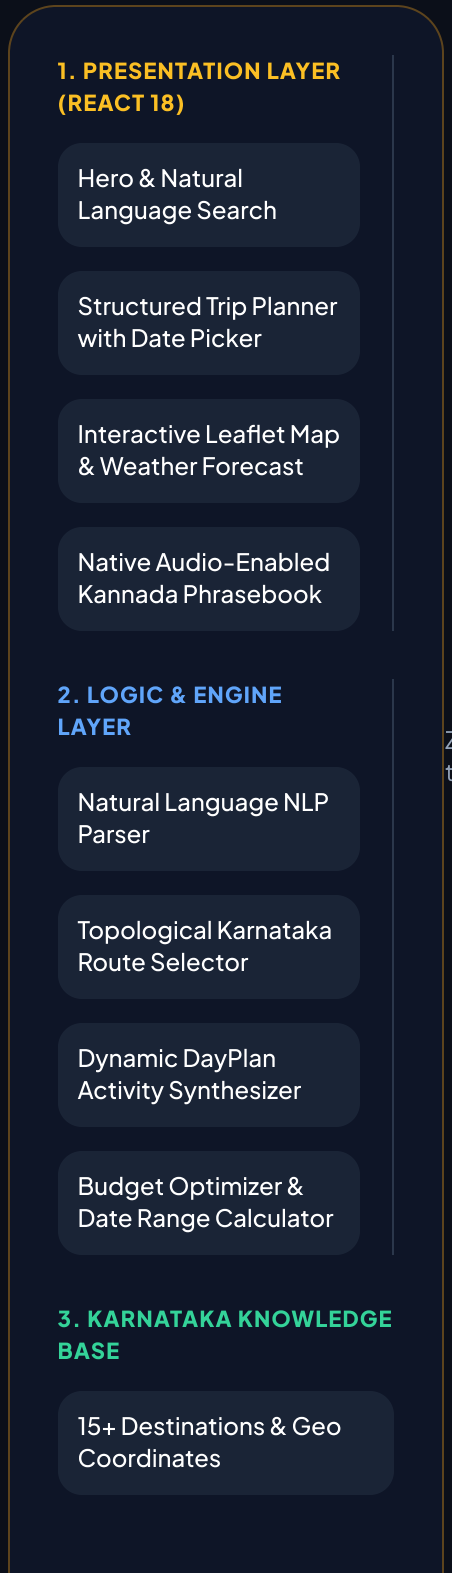

Why our approach differs from standard AI projects:

Standard projects send prompts to a remote LLM API that invents fake prices and random routes. Our approach uses a **deterministic knowledge engine** with pre-verified transit rates, real property databases, and topological graph traversal — delivering instant, 100% reliable results with zero API costs.

SECTION 5: SYSTEM ARCHITECTURE

High-Level System Architecture & Data Flow

Multi-tier component architecture connecting client, logic, and domain knowledge

Zero external server dependency • Zero user tracking • Instant sub-second response times

SECTION 5: TECHNOLOGY STACK

Technologies, Frameworks & Engineering Stack

Carefully selected modern tools prioritizing performance, accessibility & aesthetics

Total client bundle size: ~180 kB gzip • Lighthouse performance score: 95+

⚛️ React 18 + TS

Frontend Architecture

Type-safe components, high performance state re-renders, scalable structure.

⚡ Vite 5

Build Tooling

Sub-second Hot Module Replacement and production bundling under 15 seconds.

🎨 Tailwind CSS

Light & Dark Theme UI

Custom warm ivory/sand palette, ambient light mesh, and responsive styling.

🗺️ Leaflet API

Geospatial Mapping

Open-source maps with sequential routing without expensive Google Maps billing.

📢 Web Speech API

Speech Synthesis

Browser-native audio pronunciation for Kannada travel phrases.

✨ Lucide + Confetti

Micro-Interactions

400+ vector icons, celebratory particle effects on itinerary save.

💾 LocalStorage

Offline Persistence

Zero-database privacy: user trips saved locally in the browser.

🌐 Noto Sans Kannada

Typography

Google Fonts typographic pairing for authentic Kannada glyphs.

VALIDATION & TESTING

Live Validation Across Extreme User Scenarios

Stress-testing the planning engine against real-world user queries

Scenario A: ₹5,000 Solo Backpacker

```
"I have ₹5,000 budget. Give me a 5-day trip starting tomorrow from Bengaluru."
```

- **Transit:** KSRTC Sarige Express buses (~₹180/day)
- **Stay:** Verified Zostel backpacker dorms
- **Total Cost:** ₹4,850 (strictly under ₹5k)
- **Result:** Passed with zero budget breach

Scenario B: 5-Star Luxury & Only Cab

```
"Plan a 3-day luxury trip to Coorg with 5-star resort and only cab."
```

- **Transit:** 100% Private AC Cab with chauffeur
- **Stay:** Evolve Back / The Tamara luxury villas
- **Mode Isolation:** Zero buses or trains
- **Result:** Complete luxury tier adherence

Scenario C: Waterfalls Only & Dates

```
"I have ₹8,000 and 4 days. Give me only waterfalls starting this weekend."
```

- **Sightseeing:** Jog, Hebbe, Abbey & Jhari Falls only

✓ All scenarios tested and verified with zero compilation or runtime errors.

SECTION 6: CONCLUSION & IMPACT

Summary of Solution & Real-World Impact

Transforming travel planning for travelers, regional tourism, and culture

A complete, production-ready travel product built to celebrate Karnataka.

Impact on Travelers

- Cuts planning time from **12 hours to 10 seconds**.
- Removes budget anxiety through transparent itemized tallies.
- Provides genuine confidence in feasibility and safety.

Impact on Karnataka Tourism

- Directs tourism beyond overcrowded hubs into eco-destinations (Shivamogga, Badami, Dandeli).
- Promotes local culinary businesses and certified homestays.

Cultural Preservation

- Normalizes native **ಕನ್ನಡ (Kannada)** in cutting-edge AI software.
- Audio phrasebook breaks language barriers between tourists and locals.

Future Scope & Expansion

01 **KSRTC & IRCTC Live Booking:** Deep API integration for real-time seat availability and one-click bus/train reservations.

02 **Offline PWA Support:** Service Worker caching allowing full itinerary and map access in deep Western Ghats valleys without cellular signal.

03 **Audio GPS Guide:** Geolocation-triggered audio commentary explaining temple architecture and local legends.

FUTURE ROADMAP & VISION

Open for Q&A
